SYSTEM FEATURES

Vogue Polyresin3 Shutters are precision cut plantation shutters and assembled using the latest computer technology. With unique features unmatched by any other type of shutter, they are fire retardant, self-extinguishing and fully approved for use in hospitals, hotels, offices and commercial buildings. Louvres are available in 64mm and 89mm widths and all Vogue shutter doors incorporate concealed sculptured door pulls. Vogue Shutters also help lower room temperatures by up to 57%, representing major savings on air-conditioning costs.

Lockable tilt bar prevents slats from moving under extreme wind conditions.

Clever two-part pin hinge design allows quick, simple shutter removal for easy cleaning.

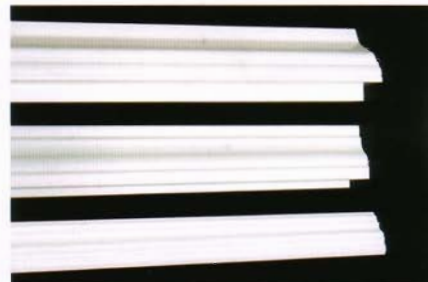

Special 'Z' frame contour ensures a neat fit, even in out-of-square openings, without the need for additional finishing or moulding.

Cleverly concealed door-pull. Functional design, virtually invisible which doesn't spoil the refined look of the shutters.

Vogue's exclusive 'Clearview' system is available with optional concealed tilt bar control.

A wide range of Vogue decorative frame designs to blend with every décor.
