

Liquid Magic Cake Pops

Steps:

1. We used Gold Liquid Magic, but you can use any colour you like.
2. Take your Liquid Magic gel pouch out of the bucket.
3. Using the card inside, scrape the gel away from the corner of the bag.
4. Then cut the corner of the bag with scissors and pour the gel into a cup deep enough to dip the cake pop into.
5. Take your pre made cake pop and place it over the cup and slowly immerse into the gel.
6. Continue to cover with gel, trying to do this in one smooth motion.
7. Once covered, start to slowly take the cake pop out of the gel.
8. Do not spin on the stick as you are removing it from the gel. Bounce it as you will get a cleaner finished product
9. When dry, re-coat the chocolate one as I find this leaves a better shine if they are coated twice.
10. Dip them exactly the same way as previous steps. Leave on a cake pop rack to dry.
11. This is how your cake pop should look.
